

## HOME SECURITY SURVEY

Take a few minutes to follow this list of recommendations to help secure your house. By checking off each item on the list you will significantly reduce the chances that you will be one of the millions of homes that are broken into each year.

| FRONT YARD  Street numbers easily visible from street.  Critical time can be saved by emergency vehicles when the street address of the house is clearly visible from a distance.   | GARAGE DOOR  ☐ Internal lock ☐ External lock with hasp ☐ Hinges secure  |
|---|---|
| □ Bushes, shrubs and trees are pruned away from windows and doors. Burglars and thieves are less likely to break into a window or door when there is a chance to be seen. □ Bushes, shrubs and trees are pruned to eliminate other potential hiding places. A residence offering limited potential hiding places is less attractive to a burglar. □ Limited or directed access to yard. A fence with gates or shrubs at the front of the yard will create a physical and mental barrier that burglarswill be less likely to cross. □ Locks on gates, where applicable. The ease of entrance to the yard is additionally reduced by locking out potential intruders. □ Lighting covers the entire front of house and all | FRONT ENTRANCE DOOR  Door construction solid core metal clad Dead bolt with minimum 1" throw Strike plates Door jambs secure Molding tight and secure Hinge pins on inside or otherwise secure Viewer or window in door Warning sticker clearly visible For double doors, stationary door secured WINDOWS: SLIDER DOUBLE HUNG CRANK LOUVER Security device in place (pin or lock) Comments:   |
